TealTeam event checklists — FTC Athens Qualifier, Sat 2026-10-24

1 Pi, 4 scout Chromebooks, 1 lead Chromebook, phones for viewing. Profile `deploy/profiles/ftc-qual-4robot.env`. Every command runs on the Pi.

Friday

☐ Check for a new Team Update that changes scoring.

☐ Chromebooks and phones wiped (old site data cleared) and charging.

☐ Phones: open `http://tealteam.local/` once on the wired network so the offline copy loads.

☐ Printed: runbook (laminated), one Chromebook card per laptop, paper scouting sheets for a full day, this page.

☐ Backup taken and a restore checked.

Night before

☐ Pi built from the final tag; `status.sh` clean; `check-backup` ok; backup on the stick.

☐ Packed: switch, Pi supply, one cable per Chromebook, USB-C Ethernet adapters, gaff tape, USB stick.

☐ `roster.csv` filled in: real names, the lead as admin, the 4 scouts, team numbers.

☐ Phones charged; offline copy loaded.

At the venue

☐ Cable before power; switch first, then the Pi; wait for the green light.

☐ `deploy/pi/network/status.sh` has no `FAIL`. Pi clock (`date`) is right.

☐ One Chromebook opens `https://tealteam.local/` with no warning (its CA trusted, per the card); then all of them.

☐ The CA folder (`/srv/tealteam/data/tls`) is on the backup stick.

☐ Schedule posted (save as `athens.csv`, header `match,red1,red2,blue1,blue2`, `*` = surrogate): run `prep-event.sh … --roster roster.csv --csv athens.csv`.

☐ Every match checked against the printed schedule.

☐ Print `signin-sheet-*.txt`, hand it out; shred it after the event.

☐ Assignments says “N of N robots in upcoming matches have a scout”.

☐ One scout, one match, check the result; then the full crew.

☐ Backup to the stick after every qualification round.

If the app goes down: paper

Scouts switch to the paper sheets (one per robot per match). The lead writes each switch below. Once the app is back, the **lead** types each sheet in, in the sheet's order, and adds `PAPER` to that observation's *Rule incidents*. Keep the sheets after entry.

Time to paper	Time back	Matches	What happened
